FORWARD

This issue of WILDLIFE ABSTRACTS is a summarization of and an index to the 19,021 citations appearing in WILDLIFE REVIEW numbers 141-159, and spans the five-year period 1971-1975. It is the fifth issue in a series covering the period 1935-1975.

The publication is divided into five parts: main citation, and author, geographical, subject, and systematic indexes. Each citation is followed by a WILDLIFE REVIEW number, such as WR 141:12. This number indicates that the original entry, together with author's address, will be found in Number 141 on page 12 of WILDLIFE REVIEW. Although effort has been made to standardize the indexes, surnames for some authors and scientific names of some taxa are treated differently in individual journals. Therefore, a scan of several places in respective indexes may be required to locate a specific reference.

Camera copy for this issue of WILDLIFE ABSTRACTS has been generated by computer programs developed by the Editorial Office, U.S. Fish and Wildlife Service, Colorado State University, Fort Collins, CO 80523.

Much credit for data input and manuscript preparation is due Constance Lemos and Diane Castellanos.
